CloudSynergy

Cloud Backup for Business

Protect all of your valuable data and sleep easier at night.

Cloud Synergy Cloud Backup is an enterprise-grade direct-to-cloud backup solution that protects Virtual machines, MS SQL, Exchange, servers, desktops, laptops, all in one solution.

Key Features & Benefits

Advanced Filtering

Use filtering to include or exclude certain file types. Avoid backing up files larger than a specified size, or backup files modified within the past 5 days.

Unlimited Version History

Keep as many file versions as you need to meet your continuity objectives. There are no limits to the number of versions you can backup with DataShield.

Ransomware Detection

Ransomware is a growing threat to the security of our data, with damages costing billions each year. DataShield keeps your files safe by scanning and not backing up files detected to be compromised by ransomware.
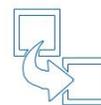

Strong Data Encryption

DataShield gives you the ability to encrypt your files with strong AES-256 bit encryption. Encrypt your file names as well to ensure maximum privacy of your data.

Fast Speeds to the Cloud

Datashield offers many advanced configuration options to ensure your backup and restore events are quick. Change memory options and network settings to accelerate your data transfers.

Image Mode Server Backups

DataShield gives you the ability to create an image mode backup of your servers to be stored securely in the cloud. Use these images as part of your continuity and recovery plan.

CloudSynergy

How It Works

Mass Deployment

You can mass deploy backup software to branch office laptops, desktops, and servers. You can even integrate your deployment with Active Directory to automatically create accounts.

Setup Email Alerts

Create alerts to show errors, warnings, successes, missed backups, anomalies, or any combination of these. Proactive alerts will save you time and ensure all of your organization's data and devices are protected.

Test a Recovery

With Cloud Synergy Cloud Backup, you can recover files and folders, even entire images, in seconds. With unlimited testing, you can even run as many test recoveries as you'd like.

Regulatory Compliance

Cloud Synergy Cloud Backup has been built to meet the needs of businesses and organizations that handle sensitive information. Proactive regulatory compliance capabilities ensure that you stay ahead of potential data risks.

HIPAA	Sarbanes-Oxley (SOX)	SSAE16	FINRA	PCI	CJIS
